

ActiveSync is provided with most Windows CE devices and complete instructions are normally included on the compact disc that is provided with the device. If ActiveSync is not provided with your Windows CE device or you want to use the most current version of ActiveSync, you can download the ActiveSync program from the Microsoft Download center.

To use the Microsoft Download center and install ActiveSync, follow these steps:

1. Go to the following Microsoft Web site:

<http://www.microsoft.com/downloads/>

2. Under **Operating System** , click the operating system that you are using, for example, **Windows 98** .
3. Under **Product Name** , click **ActiveSync** , and then click **Find It** .
4. When the download list appears, click the ActiveSync program that you want, for example, **ActiveSync 3.1 Synchronization Software for Windows** .
5. When the ActiveSync information screen appears, select the language that you want, and then at the bottom of the page, click **Download Now** .

An installation tool will be downloaded, followed by the ActiveSync program.

6. **Follow the instructions** of the accompanying wizard to download, install, and synchronize with your Windows CE device.
