Carlson Software
INVESTIGATIONS

Carlson Software Investigations (CSI) 2004 is designed with powerful forensic diagraming capabilities to measure and map crime scenes and traffic accidents. CSI 2004 is ideal for city and county police departments, State Police and consulting firms engaged in accident reconstruction.

CSI 2004 is an expansion of the Nikon AIMS and Sokkia LEA software packages. It is recommended that police departments with AIMS or LEA upgrade to CSI 2004.

New features in CSI 2004 include:

- Drawing Wizard easily steps the user from downloading to drawing in a matter of seconds
- Placement of photo images on the mapped accident scene
- Enhanced Accident Reconstruction Toolbox — Reports export to Word, simplified report personalization with custom tab labels, and custom user symbols
- Multiple "undos" & "redos"
- A new on-line word processor streamlines accident narrative
- Supports all major brands of data collectors and data collection software including the new Carlson SurvCE and CG Field Plus
- Updated database for speed-before-crash determinations, with dimensions on all major vehicles through 2003
- Reads and writes true AutoCAD® drawings using the built in AutoCAD 2004 engine

For a demo CD or further information, contact Carlson Software at 606-564-5028

New licenses are $1495.

Upgrade from Nikon AIMS or Sokkia LEA for only $495
